

Dear Customers,

The European REACH legislation (Regulation EC N. 1907/2006) has entered in force on 1 June 2007.

Under REACH regulation, polymers are exempt from registration and evaluation. All the products we commercialise are polymers so, they are exempt from registration.

The above mentioned includes all Pearlstick<sup>®</sup>, Pearlthane<sup>®</sup>, Pearlcoat<sup>®</sup>, Pearlbond<sup>®</sup> and Disperbond<sup>®</sup> products.

However, the raw materials used in the manufacture of our products must be registered.

We have been in touch with all our suppliers and we have obtained the confirmation that all the raw materials we buy from them to use in the manufacturing of our products have been pre-registered.

Merquinsa has also pre-registered the raw materials we import for the manufacture of its products.

For this reason, we can guarantee the supply of the whole range of our products until obtaining the registers of all the raw materials.

Merquinsa commits itself to obtain from their suppliers, information about the register of the raw materials supplied by them within the settled period.

Merquinsa commits itself to inform their customers of these registrations.

Signed in Montmeló, Spain, on 5 November 2008.
